That is how to size the appropriate mesh-cover for your stretchable garments such as t-shirts, jumpers, polo shirts etc.

Measure the width of your t-shirt in the middle (as shown below). Select a mesh-cover which is around 4 - 5 cm wider as the t-shirt. If the determined size is between sizes, choose the larger one.

The example below shows a t-shirt size of 50cm, so the corresponding size is the one with 55cm (size M, shown on next page).
